Violation: None Noted

General Comments:

Today's routine inspection was prompted by a complaint (CO#10509) alleging the facility is infested with cockroaches. During today's inspection, no evidence of cockroaches was observed. The owner provided proof of monthly pest control service for this establishment. As a result, the complaint could not be substantiated and will be dismissed.

During today's inspection, the following was observed:

1. Hand wash stations were stocked with soap, paper towels, and hot water.
2. All cold holding units measured at or below 41.
3. Hood baffles were observed recently serviced
4. Records of valid food handler cards were provided.
5. The chlorine sanitizer after the mechanical dishwasher's final rinse measured at 50 ppm.

While onsite, the owner stated that the facility installed a new water of the same size as the previous water heater and that a permit with the City of Lemoore was pulled for the installation. While onsite, it was also noted that the owner is redoing the restrooms and currently has one closed due to the remodeling. The other restroom has been converted to an all gender restroom and remains open. Our department has not received construction plans for the restroom remodeling and as a result, the owner must indicate to our department what type of flooring will be installed. As a reminder, the flooring must be easily cleanable and have a 3/4 inch radius cove.
